Dear Customer!

What a pleasure it is to be able to announce the launch of our expanded product line with over 1000 chemical products!

For me, this is a dream come true, as I have been working at Pharmco for just under 10 years. When I first came to this great organization, we had a dream to expand the product line much further than our current product offering. With time came many changes, two of the more impactful being: our purchase by CAI (now GFE) leading to many years of expanding ethanol products and sales; and the merger with AAPER, that required several years of integration. Throw in all the curve balls the economy can throw at you and season it with the exponential increase in government regulations and I began to wonder if we would ever be able to get back to expanding our product line.

Well, that opportunity finally came and it seems somewhat fitting that within the first 100 days after being promoted to president, we would somehow find a way to launch the expanded line! **But 750 new products all at once?** Many on my staff have questioned my sanity while others have scrambled to hold onto theirs through this process! The reason however, is simple: PHARMCO-AAPER sells ethanol to nearly 5000 customers in seven major markets to hundreds of different applications. Our desire is to provide a core group of products that could be sold to all customers for every application in each of those markets. And besides, we had a lot of catching-up to do!

It would also seem that there is no better time than right now to launch this line. With the economy doing so poorly, the chemical industry in a downward spiral and prices skyrocketing on just about “everything” we are all under enormous pressure to do “something”. **So how does our expanded line help?** Simply this: *let us try to save you money on products that you are currently buying.* I can’t guarantee you that we have a better position and hence a better price on every product, but if you work closely with our sales and customer service staff, we will do everything we can do negotiate a price that saves you money and lock those prices in for the balance of this year. **Deal? So what are you waiting for!** Take a look at the enclosed list of chemicals and make a call today to your sales representative or our customer service department!

All our product specifications and MSDS can be found on our website at www.pharmcoaaper.com and if they have not been posted yet, just call our 800-243-5360 number and ask for technical support and we will e-mail it to you right away. Lets work together to lower your costs even while building upon the strengths you have always come to rely upon us for: Quality and Service!!!

Sincerely,

Paul DiMarco
President & General Manager
